Apply to: Web Developer Frontend

Dear Mr. Hung,

My name is Doan Trung Hoang, currently a senior student majoring in Information Technology at HCMC University of Foreign Languages – Information Technology. After learning about your company, I am impressed by Nam Thanh Binh's reputation in providing manufacturing management solutions (such as N-EMS, ANDON) for the garment industry. I am writing to express my strong interest in applying for the Web Development Intern (ReactJS) position at your company.

During my academic journey, I have gained solid knowledge in JavaScript, ReactJS, Node.js, and MongoDB, and have completed several projects, such as:

- Developing a Product Management Website with features for creating, updating, deleting products, and user role management.
- Building a Personal Task Management App (To-do App) using ReactJS and Firebase.

Through these projects, I have sharpened my skills in teamwork, time management, and most importantly, the ability to quickly adapt to new technologies. I am confident that my skills and passion for web development will allow me to contribute positively to your software solutions.

I expect this internship will provide me with opportunities to:

- Gain deeper insights into the software development lifecycle in a professional environment.
- Learn from experienced developers at Nam Thanh Binh.
- Improve my professional working style and sense of responsibility.

Thank you very much for considering my application. I would be grateful for the opportunity to discuss my qualifications further in an interview.

Yours sincerely,

Doan Trung Hoang
